- Seat and Back Static Load Test EN 1728:2012+AC:2013
- Seat and Back Durability EN 1728:2012+AC:2013
- Armrests Durability EN 1728:2012+AC:2013
- Armrests Downward Test EN 1728:2012+AC:2013
- Stability EN 1022:2018, clause 7.3
- Rolling Resistance of Unloaded Chair EN 1728:2012+AC:2013

## SUSTAINABILITY

Designing new polymers made entirely from recycled materials and imagining a better future. The main intention is to design these newly developed polymers ourselves – and then to manufacture them – instead of using products already developed by others. This has enabled us to join the ranks of those conducting real research in the green sector, to make its contribution to improving this field of study that is so important for the future.

### COMPONENTS DERIVED FROM INDUSTRIAL OR CONSUMER WASTE

#### RECYCLED POLYPROPYLENE (PP)

Minimum 60% recycled materials

#### RECYCLED POLYAMIDE (PA)

Minimum 30% recycled materials
