Ws.D UNO

WORKPLACE LOCKER SYSTEM

Uno: The Locker System That Fits Your World

Think of Uno as a flexible storage solution that adapts to your environment. Whether you're managing an office, workplace or even educational spaces, Uno makes it easy to create a secure, organised place for people's belongings—without feeling stuffy or complicated.

What Makes Uno Different?

- Customisable Options: Choose from single or multi-tier layouts, and pick finishes that blend effortlessly with your space.
- Friendly Design: Uno's look is clean and modern, ready to fit right in without drawing too much attention.
- Built for the Planet: Crafted from eco-friendly materials and designed for efficient operation, Uno cares about the environment as much as you do.
- Smart Security: From simple keys to motorised RFID locks, you've got a range of locking systems at your fingertips. Need more control? Pair Uno with software that helps you track usage, manage access, and stay organised.

Uno isn't just a locker—it's a thoughtful storage partner that can grow and adapt as your needs change. It's straightforward, it's reliable, and it's ready to help you keep your space running smoothly.

Your Locker, Your Way

Uno isn't just a locker—it's a flexible system that can shift and change to match whatever you need. Perhaps you're fitting out a small corner in a busy office, or lining an entire corridor in a school. With Uno, you choose the size, shape, and configuration that makes sense for your space. You can pick finishes that blend in discreetly or colours that stand out and make a statement. Whether you prefer a straightforward key lock or something more advanced like RFID, it's all about having options. Uno gives you the freedom to experiment and find the right combination, so you're never stuck with a one-size-fits-all solution. It's about building a system that feels right, wherever you are and whatever your day looks like.

LOCK TYPES

Public or Shared Use

A Public (also known as Shared Use) lock system is where the user is assigned a locker for single use. When the user opens their lock, it does not retain the credential requirement. Therefore the locker is ready for the next user.

Private or Assigned Use

A Private (also known as Assigned Use) lock system is where the user is assigned a locker for continuous use. When the user opens their lock, it retains the credentials requirements for the user to use again and again. The locker can be reassigned when the user no longer uses the locker.

FACILITIES MANAGEMENT

Available on our digital locking system

Basic

An electronic key system provides reliable and cost-effective security and flexibility.

- A single yellow Programming Key assigns up to 6 Manager Keys per system
- Assign up to 20 different Users per lock
- Provides Management override access
- Provides external power against battery failure
- Elapsed-time auto unlock

Advanced

Our advanced management system leverages the processing power of the mobile tablet and application to provide more powerful tools and an easier, more detailed system management.

- A single white Data Key assigns up to 250 Manager Keys or cards per system
- User/Manager database simplifies assignment/reassignment of up to 250 Users and 250 Managers per lock
- Audit trail and usage data analytics reports
- Simple, visual battery-level indicator
- Real-time clock allows scheduled auto unlock

DIGILOCK

Contactless, Secure & Personal

Did you know Digilock Smart Locks can be unlocked via your smartphone? With Mobile ID, additional keys, combinations, or access cards are unnecessary — authorized users access secure storage right from their smartphone.

Easy Access

No more creating keys or buying RFID cards. With Digilock Mobile ID, any smartphone becomes a key, providing authorized instant access with a tap.

Flexible Management

Mobile ID works with locks in shared, assigned, or reservation modes. With DigiLink, you can change a lock mode anytime so your secure storage can flex with every demand.

Simplified Security

Quickly issue and revoke access permissions and accept reservation requests remotely via Digilock's cloud-based software, Digilink, saving you time and hassle.

Seamless Reservation

Need to reserve a locker? No problem. Users can book lockers via the same Digilock Mobile ID app they use to access the lock.

Orbital
RFID+ mobile App

Minimalist, touch-free system with advanced auto-unlock, a discreet coin-sized design, multi-directional locking, and access via RFID, mobile, or electronic key, ideal for shared or assigned use and even reservations, and it fits easily into new or retrofit spaces with a 1/2" motorised deadbolt or latch.

Versa
Manual Keypad/RFID + mobile App

Slim, all-metal housing, advanced auto-unlock, visual and audible indicators, ADA options, IP55 rating, and multiple access choices (keypad, RFID, mobile, or electronic key), perfect for shared or assigned use plus reservations, and installs smoothly across various door thicknesses with a 90° or 180° manual knob rotation.

Aspire
Motorised Keypad/RFID + mobile App

System with an all-metal housing, advanced auto-unlock, a slim 0.41" profile, non-handed design, ADA options, IP55 rating, and versatile access (keypad, RFID, mobile, or electronic key), supports shared or assigned use, parcel pickup, and reservations, and adapts easily to new or retrofit installations with adjustable thickness and a patented snap-lock or pin connector.
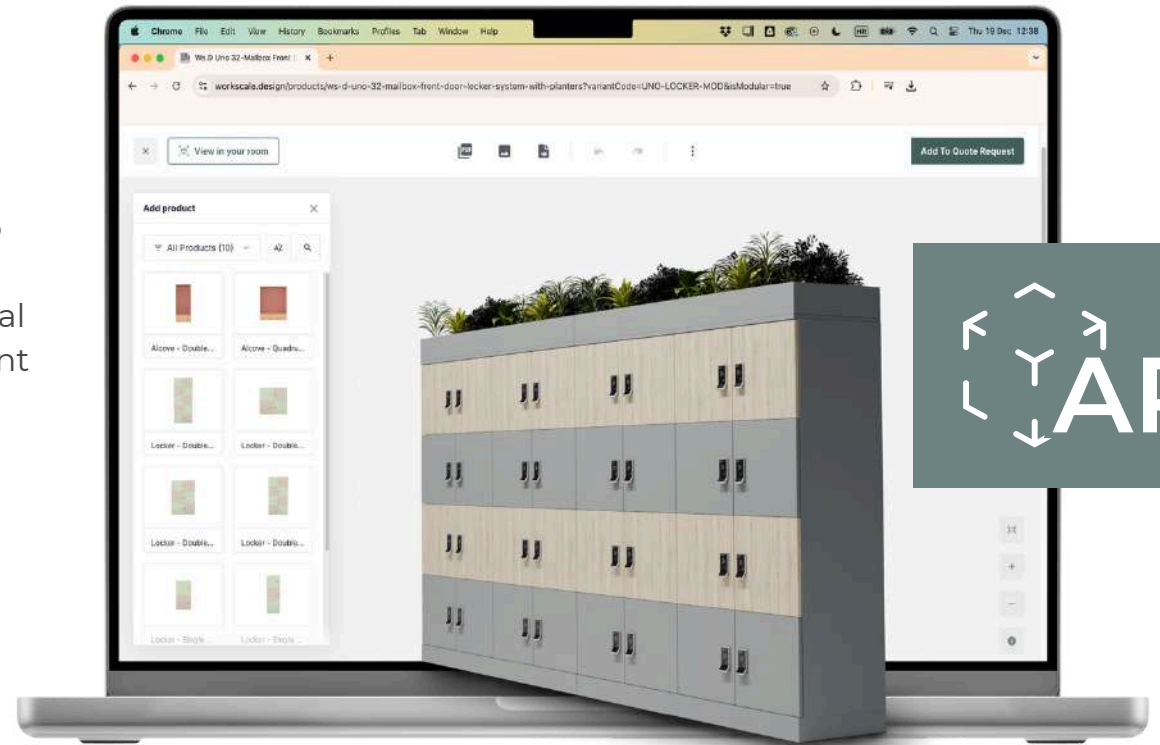

CONFIGURATOR

Click and Customise

Design your perfect Ws.D Uno Locker storage solution from anywhere in the world using our intuitive 3D Configurator. With versatile elements and numerous refined finishes to choose from, you can create a fully customised setup tailored to your space and style. Whether you're designing for an office or other commercial space, our configurator lets you experiment and visualise your ideal storage in real-time.

Using a device with a camera, our AR feature allows you to see your design directly in your space before making a decision. No space to test it out? No worries! We offer easy downloads of 3D objects compatible with all major 3D design software, ensuring a seamless design process.
